REMINGTON KEYBOARD

The above keyboard is used on some machines and differs slightly from the keyboard used for the exercises. In using a machine with the above keyboard, the operator will find it necessary to use the fourth finger of the right hand on the interrogation point instead of the second finger. There is also a difference in the location of the fractions but as these keys are all operated by the fourth finger no inconvenience should be experienced. These changes will not be difficult to make and with careful practice the operator can proceed without difficulty.

Students using this keyboard will find no changes in the lessons necessary until they reach Lesson XV.

Lesson XV—Use ; finger on ?

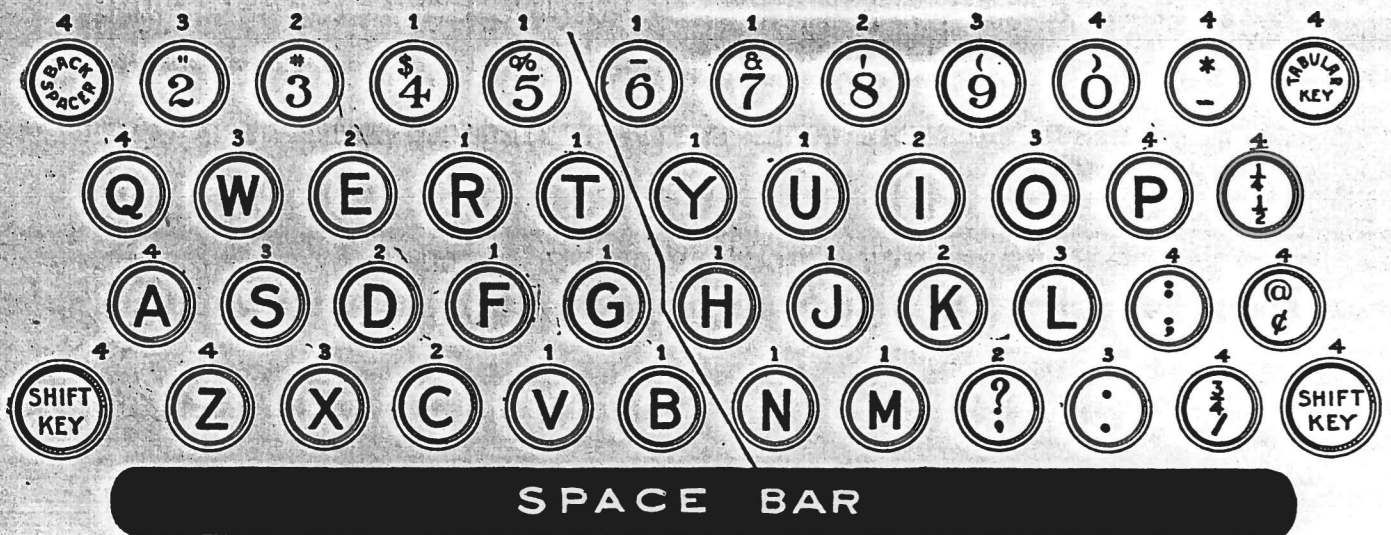

Lesson XVII— $\frac{3}{4}$ is above the hyphen instead of above diagonal.

Use the shift Lock Key when writing a series of capitals or other upper-case characters.

This keyboard has both upper-case and lower-case commas.

LESSON XVII.

See page 26 for instructions on this lesson.

DO NOT ERASE.

Use Thumbs for Striking Space Bar.
